1
git clone link
git init
composer install
firs create user tbl = yii migrate/up
2
add this to main-local :
'authManager' => [
'class' => 'yii\rbac\DbManager',
// uncomment if you want to cache RBAC items hierarchy
// 'cache' => 'cache',
],
yii migrate --migrationPath=@yii/rbac/migrations
change user_id type(auth_assignment) to integer(11)
3
move migrations files from 'aftermigration folder' to 'migrations' and run yii migrate/up

Run this sql for add a user : uname and pass => superadmin
INSERT INTO `user` (`id`, `username`, `auth_key`, `password_hash`, `password_reset_token`, `email`, `status`, `created_at`, `updated_at`) VALUES ('1', 'superadmin', 'KMihK2TpAeZ5wnwql_9IYYnrZqhLqdKh', '$2y$13$gm.fbTSMHAls2tssmsGxc.vsUL1JtCYYmr2SvxEfMAhwfOsjfVoqu', NULL, 'superadmin@gmail.com', '10', '1545819297', '1545819297');

index.php?r=site/up (befor set true in site controller)
